

Sensors in Medicine 2026

Live/streamed October 2026

Bridging academic, clinical and commercial worlds

Call for Abstracts: Oral and Poster Presentations

Sensor100 is soliciting abstracts for oral and poster presentations at the 14th Annual Sensors in Medicine Conference. The theme of the conference is the application of sensor technology in **Preventive Medicine**.

Topics which will be of interest include, but is not limited to:

Sensor Types

Linear flow and paper sensors | Wearable sensors | PoC devices |

Printed sensors | Potentiometric | Amperometric | Optical |

Implantable sensors | Others

[any stage of development: proof of concept through market acceptance.]

Healthcare Applications

Chronic disease monitoring | Fitness and well-being | Infectious diseases |

Metabolic diseases | Early detection: heart, renal, hepatic disease, cancer |

Women's health | Population screening, e.g. in the NHS | Mental Health |

Abstract Submission

Send 200 word abstracts [100 word for posters] in Word Format to:

SiM26@sensor100.com

Deadline 28 August 2026 [Please indicate if oral or poster abstract]
